

# **FROZEN DRINK MACHINE INSTRUCTIONS**

## **\*\* IMPORTANT \*\***

Be sure equipment is connected to properly grounded 120 volt power supply with 15 amp circuit. Plug machine directly into an outlet. If you **must** use an extension cord, use only #10 wire cord as short as possible. DO NOT machine use in direct sunlight.

**USE FRUSHEEZ FROZEN DRINK MIX ONLY  
USE OF ANY OTHER PRODUCT MAY RESULT IN IMPROPER FREEZING**

**DO NOT CHANGE SETTINGS! THEY ARE AT THEIR OPTIMAL SETTINGS!**

## **MIXING**

Mix one bottle (½ gal. of concentrate) with 2 gallons of water, (hint: use empty mix bottle x 4) Pre mixing will expedite freezing. Pre-cool the mixture prior to pouring into the machine. Makes approximately 40 - 8 oz. servings. It will take approximately 45 minutes for fluids to freeze.

\*\*\* Adding alcohol will drastically slow the freezing process\*\*\*

We suggest you add alcohol after you have poured the drinks or allow additional mix time!

Pour the mixture in to machine's bowl, up to the maximum fill-line. **DO NOT OVERFILL!**

## **OPERATION**

1. Install the cover and check that it is correctly placed over the bowl.
2. Make sure barrel (container) is correctly snapped in.
3. Set the power switch to 'I' ON position. DO NOT run machine dry (without mix)
4. Set the mixer/refrigeration switch to 'II' FROZEN position.  
If mixture begins to over freeze, turn switch to 'I' CHILLED position.
5. Set the light switch to 'I' ON position.
6. Refill bowl when empty with pre-mixed, pre-cooled product.

## **CLEANING**

1. Empty any remaining contents.
2. Rinse bowl by adding clean warm water, and completely drain.
3. Please DO NOT disassemble the machine, we will take care of the rest of the cleaning.
